

McPhee Electric PV solar

In evaluating its entry into the turnkey solar development market, PowerHawke, Inc. worked with McPhee Electric, Ltd. to demonstrate the full range of financial, regulatory, permitting, design, construction, and commissioning services required to successfully implement a system.

Market:
Engineered Solutions

Date:
2017

This project explored and vetted all aspects of this solution to prove the viability for development of projects directly with clients.

Location:
Farmington, CT

The current confluence of CT incentives, Net Metering and Federal tax treatment have all combined to create an environment ripe for these types of projects at an attractive investment hurdle.

Engineering Services Provided:

- EPC (Engineer, Procure, Construct)
- Supervise/coordinate Engineering & Construction subs
- Primavera Project Management
- Scheduling
- Procurement
- Vendor submittal reviews
