

The image shows a close-up of a metal plate with the word "NUCOR" embossed in large, green, block letters. The plate has two circular fasteners on either side. A yellow and green curved graphic element is visible in the top left corner of the page.

NUCOR

Nucor Steel Connecticut, Inc.

PowerHawke, Inc. provided major de-energized preventative maintenance and testing for Nucor Steel Connecticut's Wallingford location. The contract involved three Saturday shut-downs to clean, exercise, and test electrical system components within their Switchyard, and Main Substations. Additionally, PowerHawke performed transformer fluid analysis testing for nine transformers within the Nucor plant.
